DI 189067 J CANNON

interviews of the children giving disclosure to people to raise awareness of the satanic cult.  
This may continue.  
At this time there are no offences however if it continues we will need to review.  
Apparently he is coaching disclosures and the children have created a bigger and bigger lie.  
This has had a massive emotional impact on the children and will affect them for life...the OIC and DS  
Redmond has considered criminal charging opportunities but have not be able to identify any specific  
suitable offences.  
We are of the opinion that it is not appropriate to re interview the children following the trauma they  
have been thro.  
He has convictions for offences against his own children and I would suggest is May because future  
safeguarding issues with these victims if they returned home.

Intelligence records must be up dated should he come to notice in the future.

Shop keeper disclosures. (Islington)  
The Shop keeper to be contacted and assured that the children that attended his premises on 7th Sept  
fabricated their stories.

I have fully updated DCI Foulkes.

This investigation is closed subject to the actions above

CIV 12160 MB BOUKER

No crime confirmed

23/09/2014 11:03

DC 219414 S MARTIN

further offences relating to Abraham had been considered Namely  
Assault Common/Abh  
Neglect

the offences of the assault have all occurred outside of the MPD (morocco) so we do not have the  
powers to enforce crimes of this nature that may of occurred outside the uk  
as for Neglect the children do not display any obvious signs of emotional distress and so the crime of  
neglect does not fit also the ongoing questioning of the children went on in in Morocco so

again outside the MPD. I have noted that Mr Cannon feels that the effects of Abraham would affect them for life however at this point the children are not displaying the evidence of this, it may be in the future that this differs and the children do show some affects from their life with abraham and they require psychological input from agencies but this has not been evidenced at the moment.
